Notice from South Plains Telephone Cooperative, Inc.

As you may, or may not, know, internet and TV rely on infrastructure and those sites having power. As a result of the weather conditions and power outages across Texas, it has the potential to impact SPTC customers.

Although we do not anticipate an outage, some of your normal services could be affected:

- web-surfing may be interrupted and the site you are trying to access unavailable.
- SPTC TV services could lose signal

Please take advantage of the uptime to get any critical on-line processing taken care of immediately.

We will continue to monitor the situation.
